Paul, Mr Miller, Elizabeth, Ms Marsh : The Digital Renaissance of Work: Delivering Digital Workplaces Fit for the Future before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Digital Renaissance of Work: Delivering Digital Workplaces Fit for the Future:

2 of 2 people found the following review helpful. A book that gives a good introduction and insights about digital workplace
By DinA book that gives a good introduction and insights about digital workplace. The "How-to", which forms the second part of the book, allows me to gain a better understanding on the strategy, implementation and governance - making it a one-stop shop for all you need to know about digital workplace!

following review helpful. A balanced, useful book that doesn't get lost in the techBy Ephraim FreedI highly recommend this book, but not just as general reading. I think the book is of particular interest to people who manage intranets and other digital tools at large organizations. The book's case studies from leading global organizations are inspiring, and the strategic guidance is very interesting. The Digital Renaissance of work strikes a balance in many ways. First, it balances cultural critique with practical guidance. Next, it balances layman language with technical references. While it's a book about the use of technology, the book uses straight forward language. Each chapter even begins with an inspiring, poetic quote which pulls the book up from the dry technical mud that such a tomb could get lost in. The book is an easy read and presents a refreshingly positive view of the digital future, especially in an age when the imminent takeover of our jobs and our lives by intelligent machines seems to take up half the public story line. The book is a little light on imagery and visuals, and some of the guidance in the second half could have provided a little more detail. But overall it is an inspiring read and thought piece, and a useful road map for moving from an intranet-focused perspective to planning for broader digital workplace management.

The Digital Renaissance of Work: Delivering Digital Workplaces Fit for the Future takes the reader on a journey into the emerging technology-led revival of work. Paul Miller's follow up to his critically acclaimed The Digital Workplace picks up the story to provide organizations with an understanding of the structural and organizational implications the emerging technology has for the workplace. His insights, backed by the considerable research of the Digital Workplace Forum, offer a lifeline to organizations needing to make better sense of a very uncertain future.

Shortlisted for the CMI Management Book of the Year awards 2015/16, in the Management Futures category. The impact of accelerating digital and physical convergence as our work life transforms toward the digital + physical blur is well represented in this new book by Paul Miller. Digital workplace transformation will enhance human performance and innovation across all industry sectors. Digital workplace transformation will further enrich our daily human life experience and our daily work life experiences. --Peter Miscovich, JLL (Jones Lang LaSalle) This book gets to the fundamentals of work in the digital realm of organisations today. Miller and co-author Marsh offer a humanist perspective on the fast digitisation of what used to be office-based work. It first stimulates our thinking and then, based on the vast and rich history of the Digital Workplace Group, situates these ideas in real and practical case material. This book will prepare you for the new age of work in organisations. John Baptista, Warwick Business School, UK One of the most comprehensive, complete and compelling journeys toward the new frontier of the digital workplace. The latest work by Paul Miller offers one of the most thorough roadmaps for the digital traveller, who wants to be ready for the work environment of tomorrow. Nothing is omitted from this powerful narrative that touches on technology, but also on processes and even the psychology and ethical make-up of the digital workplace of the future --Giovanni Piazza, Johnson Johnson - Discovery Sciences The future work agenda is gathering pace. In this optimistic and informative book, Miller and Marsh offer a guide to the thorny challenge of making digital workplace strategies more human. Alison Maitland, co-author of Future Work As the digital workplace becomes the borderless enterprise, this book demonstrates pragmatic foresight on the integration of, and augmentation with technology, never losing sight of the fact that humans are at the center of the digital workplace. Steven Tiell, Global Head Technology Vision, Accenture Paul and Elizabeth live at the forefront of the digitization of work, but remain primarily focused on people and the impact of technology on the human condition. The Digital Renaissance of Work provides a fresh and refreshingly optimistic insight into how we'll work in the future. --Ryan Anderson, Director of Future Technology, Herman Miller About the Author Paul Miller has been at the heart of the work and technology revolution for 20 years. He is CEO and Founder of the Digital Workplace Group and author of The Digital Workplace: How Technology is Liberating Work and Mobilising the Power of What You Know. He has given many inspirational keynote talks on the digital future of work to senior executives and addressed large employee events at Microsoft, Google and Adobe. For five years he hosted internet radio Digital Workplace Live and was Executive Producer of IBF24 and DW24. After an early career as a City editor and speechwriter, he published the influential WAVE magazine. Elizabeth Marsh is a writer and researcher with a background in intranet and knowledge management at companies such as Reuters and T-Mobile (UK). She manages Digital Workplace Group's best practice research programme, which provides organizations with practical insights and thought leadership across intranet and digital workplace topics. She also regularly works with DWG's clients on consulting projects.
