**Alex He : The Dragon's Footprints: China in the Global Economic Governance System under the G20 Framework** before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Dragon's Footprints: China in the Global Economic Governance System under the G20 Framework:

The Dragon's Footprints: China in the Global Economic Governance System under the G20 Framework examines China's participation in the G20; its efforts to increase its prestige in the international monetary system through the internationalization of its currency, the renminbi; its role in the multilateral development banks — the Asian Infrastructure Investment Bank and the New Development Bank; and its involvement in global trade governance, in light of the dazzling growth its economy has experienced since its ascension to the World Trade Organization in 2001. Clearly, China has its own views on how to engage with governance bodies and what benefits it expects to reap from its participation in global economic governance. There is no doubt that China is leaving its footprint on many aspects of the international financial system through its growing engagement with and greater integration into the global economy. The Dragon's Footprints provides an in-depth discussion of what China has gained and learned from this experience and considers the implications for its foreign policy and future economic development.

About the Author Xingqiang ("Alex") He is a CIGI research fellow. Prior to joining CIGI, Alex was a research fellow and associate professor at the Institute of American Studies at the Chinese Academy of Social Sciences. At CIGI, he is focusing on China and the G20, China
