Development is a global issue not an issue only of developing countries. But for these countries the book is fine.0 of 0 people found the following review helpful. Five StarsBy CustomerThis book exceeded my expectations. I would purchase from this seller again.0 of 7 people found the following review helpful. terrible! it's missing a titleBy RubberDuckieAs the title of this review

already says, the book is missing the title on the cover! It says "the dynamics of socio-economic" ! What happened to the word "Development"?!

Why are poor countries poor and rich countries rich? How are wealth and poverty related to changes in nutrition, health, life expectancy, education, population growth and politics? This modern, non-technical 2005 introduction to development studies explores the dynamics of socio-economic development and stagnation in developing countries. Taking a quantitative and comparative approach to contemporary debates within their broader context, Szirmai examines historical, institutional, demographic, sociological, political and cultural factors. Key chapters focus on economic growth, technological change, industrialisation, agricultural development, and consider social dimensions such as population growth, health and education. Each chapter contains comparative statistics on trends from a sample of twenty-nine developing countries. This rich statistical database allows students to strengthen their understanding of comparative development experiences. Assuming no prior knowledge of economics the book is suited for use in interdisciplinary development studies programmes as well as economics courses, and will also interest practitioners pursuing careers in developing countries.

"This monumental study is historically grounded, balanced, nuanced, rigorous, eclectic, and reader-friendly. All serious scholars and practitioners of economic development will want to have a copy on their shelves. The volume is also ideally suited as a text for a development economics course." --Hal Hill, H.W. Arndt Professor of Southeast Asian Economies, Australian National University
