Rowena Olegario : The Engine of Enterprise: Credit in America before purchasing it in order to gage whether or not it would be worth my time, and all praised The Engine of Enterprise: Credit in America:

Tracing credit from colonial times to the present and highlighting its productive role in building national prosperity, Rowena Olegario probes questions that have divided Americans: Who should have access to credit? How should creditors assess creditworthiness? How can borrowers and lenders accommodate to the risks of a credit-dependent

economy?

A valuable scholarly contribution for its marshaling of such a large amount of information on credit throughout American history and for wrestling it into a coherent narrative. (Bruce H. Mann, Harvard Law School) A clear, well-written synthesis showing a command of a wide range of literatures relating to private credit. There is no other book with its long historical range. (Richard E. Sylla, Stern School of Business, New York University) About the Author Rowena Olegario is Senior Research Fellow at Saïmon Business School, University of Oxford.
