By MarquisDaSade69I had to purchase this book for class so did not really know what to expect. As of right now I have enjoyed this book and it brings an in-depth sight into the policy of NGOs worldwide. It is not as dry as I thought it would be. This books is also helpful for anyone who wants to be involved in the NGO world or is thinking about pursuing their own foundation of an NGO.

Exploring the newly emerging field of the management of Non-Governmental Organizations (NGOs) working in developing countries, this informative book draws upon current research in non-profit management, development administration and business management. Key issues covered include: * the changing global and local contexts of development co-operation * management technologies such as empowerment and stakeholder analysis * structural issues such as accountability, governance and participation * learning and diversity * dealing with complexity and uncertainty. Illustrated throughout with examples drawn from the author's own research and consultancy experience, this important text develops a model of NGO management which reveals the distinctive organizational challenges they face.
