Daniel Drache : The Market or the Public Domain: Redrawing the Line (Routledge Studies in Governance and Change in the Global Era) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Market or the Public Domain: Redrawing the Line (Routledge Studies in Governance and Change in the Global Era):

Examining the powerful idea of the return, reconstitution and redeployment of the public domain in a post-Seattle and post-Washington consensus world order, this innovative book is the most forward-looking and comprehensive examination of the need to rethink the tenants of global free trade. In the past two decades, countries have focused on broadening and guaranteeing market access, and as the pendulum swings back for the market, the issue of investing in the public domain becomes a priority. The authors believe that devising new institutions of governance for a globalizing world requires fundamental change nationally and internationally. They argue that new public spaces, places and services are required to strengthen democracy and create sanctuaries in society where the market mechanism cannot reach. The public domain is an incipient concept that enables states to reduce the intrusiveness of markets and at the same time develop a strong national performance to reduce the inequality and social exclusion in an increasingly volatile global economy. This original volume boasts an impressive list of international contributors who have demonstrated innovation and leadership in their fields. It will strongly appeal to advanced students, academics and policy makers involved in the field of global governance and international political economy.

Fifteen papers from contributing economists consider the return, reconstitution, and redeployment of the public domain in a post-battle Seattle and post-Washington consensus world order. Papers focus on social disability and the public good; human security in the global era; regionalism and the meso public domain in Latin America and Southeast Asia. *Journal of Economic Literature* Sept 2002

About the Author Daniel Drache is Director of the Robarts Centre for Canadian Studies and Professor of Political Science at York University.
