Reiling Remarkable book reflecting the positive mind of the author and how to develop that same energy and mission. This is for the 1% of Doers, as he states, and maybe bring the Observers up to a new level of achievement. Mark Erwin is an outstanding

servant to our society. 1 of 1 people found the following review helpful. A very insightful guide regarding how to build a framework for success in both your personal and business life. By Art Ringwald To me the Powers lays out a very effective framework for creating a successful life and career. The author, Mark Erwin, has overcome some very challenging issues from his youth to become an enormous success in his personal life and his business career. The book draws from his personal experiences, the experiences of his mentors and the latest in behavioral science. It is insightful, well laid out, easy to read and understand and actionable. I couldn't put it down and finished it in one reading. My only regret is that I didn't have access to this information 30 years ago as it would have definitely changed my life for the better. Not new information (which he states rather early in the book) - but rather a new organization and curation of information and insights. I read it over a weekend when I usually don't take that kind of time for reading. And I read to the last page which I often do not (the last book that held my attention that well was Delivering Happiness by Zappos CEO Tony Hsieh) so for me that is a strong recommendation in itself. This book motivated me to get back to a book project I dropped a year or so ago and for that I am very grateful to Mr. Erwin.

It's time to discover your powers. The Powers is written for people who have a drive to become highly successful in their chosen field of endeavor. Throughout this book you will meet many who came from ordinary backgrounds to achieve extraordinary things in a variety of pursuits. They came from different circumstances with a wide range of gifts as well as many personal limitations. All have experienced failure and some were serial failures. The Powers they discovered within themselves are the same Powers Erwin has identified and discusses. Through study, they can become your Powers. While everyone has different dreams and goals, they also possess their own set of Powers, even if some are hidden deep within. Erwin has found that intellectual curiosity, developing a grand vision, setting clear goals, practicing persistence, and other concepts included in this book are common traits among the most successful people. After years of studying works by great authors such as Napoleon Hill, Norman Vincent Peale, and Dale Carnegie, befriending highly successful people, and exploring an experimental learning style, Erwin has found common traits that not only create success but also allow one to go from ordinary to extraordinary. Mark Erwin has mentored hundreds of people, both young and old, and has collected life-changing lessons throughout his journey that brought him from a sixteen-year-old in a jail cell to a multimillionaire before he was forty. In The Powers, he shares personal stories, philosophical and practical advice, and a one-of-a-kind collection of wisdom and insights from some of the most successful people in history, many of whom are friends. This book creates the blueprint for you to become exceptionally successful and maps out how using the Powers, in combination with your unique personality and emotional intelligence, will help you stand out and make a difference in whatever area you choose to pursue. Read and reread this book and your true path for success on your terms will be revealed, and you will know exactly how to make your dreams come true.
