**Sam Moyo, Michael Sill : The Southern African Environment: Profiles of the SADC Countries** before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Southern African Environment: Profiles of the SADC Countries:

The Southern African Environment provides a comprehensive and up-to-date description of the countries of the SADC region ? Angola, Botswana, Lesotho, Malawi, Mozambique, Namibia, Swaziland, Tanzania, Zambia and Zimbabwe. The area is one of rapid political, economic and social change, and each of the 10 country profiles in this book provides full and detailed information on the physical and human geography, environmental problems, resource base,

institutional structures for environmental management and the issues associated with institutional change. Each profile was drafted by local environmental experts and is based on extensive fieldwork and research originally commissioned by the Dutch government. The report provides a unique synthesis of this richly-endowed but troubled region.
