I would read just part of a chapter and my mind would begin to wonder and think about what I just read. The book causes you to think and that is always a very good thing - THINKING! It WILL cause you to think not only about where you are right at this moment but also where you want to be in the future and then it helps you create a plan to get you to where you want to be. The best way to describe what is in the book would be to simply list the Chapter Titles which are:Dare to DreamThe Essence of Self-

Belief Learning Life's Lessons Commit to Change Removing the (Glass) Ceiling on Success Being the Best You Can Be The Awesome Power of Transformational Change Taking Care of Your Health and Fitness Develop a Clear and Supported Plan of Action Sales and Marketing Knowledge Effective Communication The Gentle Art of Persuasion Additional Streams of Income The Value of Effective Time Management The Necessity for Saving Money Effective Steps to Problem-Solving The Challenge of Procrastination Empowering Our Children

In this case however, I was drawn by comments I've heard from friends and acquaintances who have read this extraordinary book. Having now read it through twice, I'm amazed at the clarity and content. It's an extraordinary piece of writing which lays open a very clear and unambiguous path to a bright future. Each chapter presents a clear step on the journey and together they weave a very comprehensive guide. Kieran has a way of writing which is compelling. His thoughtful approach to the subject of enrichment is like a magnet; it draws the reader in. I finished the book in one sitting and I'm now re-reading so I can absorb the salient points and take notes. I can't wait for the second volume. I'm already imagining the possibilities

By Customer This is one of those books that at least for me is difficult to read because it causes you to constantly stop and think about your life, your life's direction and what you can do to change it. There are magnificent quotes on almost every page that could easily become motivational wall posters. I have been posting some of the original quotes from the book to Facebook. I always judge a book on whether I would read it a second or third time and the answer to that question is definitely YES! The other question I use to judge a book is whether I would give it as a gift and again the answer is definitely YES! and WILL! Posted a review of the book on ReadForAChange.com.

Kieran Revell's latest book gives the blueprint for a life of success and outlines the benefits of dreaming of the future as you want it to be. It starts with living in the present moment. "The most important things in your life are occurring this instant." Live in the present, he says, "and you free yourself up to build on the future." Part of this approach to living involves forgetting the past and ignoring fear and self-doubt. While providing this wisdom through a unique brand of spiritual awareness, Kieran does not ignore the practical side of living your dreams.
