relate so much -- AND to late-20somethings you know. I'm 28 and read this in one day - I just couldn't stop reading one story after another. Denise is filling an important void on the bookshelf -- you won't be disappointed reading this "what I know now" and "what I wish I knew then" advice from professional 30somethings, especially if you're close to transitioning into that new decade. Thank you to all the women who shared their brutally honest and deeply passionate stories!1 of 1 people found the following review helpful. Its ok to dream big.By thealiI was about 25 when I had my quarter life crisis I knew I HAD to do more with my life and I knew I could physically and mentally be capable of more. It took believing in my dreams and not worrying about other people's assumptions of what my life should be. But I had no one to look up to, no one to push me and let me know it's all going to be crazy but ok. I'm happy it was Denise who wrote this book because her interviews with these wonderful women boosted not only my confidence, but my hope that other women will find inspiration to aspire to 1. dream 2. accomplish their dreams without having to dependent on someone else to okay them.0 of 0 people found the following review helpful. Came at the right timeBy Kindle CustomerI've been at loggerheads at where my 30s should be career-wise and family-wise. It's uplifting to read other women with such dilemma and coming up with a path for themselves. Still on the journey of discovery of me, and that's a new story that Irsquo;m on.

The 30s are roaring. Itr's a time in womensquo;s lives for breaking personal and professional barriers. But try Googling ldquo;successful women in their 30s,rdquo; and yoursquo;ll be served up articles like these:ldquo;Why Are Women In Their 30s Still Single?rdquo;ldquo;Are Professional Women In Their Mid-30s Too Independent?rdquo;ldquo;Why Women Lose The Dating Gamerdquo;Denise Restauri, the founder and CEO of Girlquake and the executive producer of the inaugural Forbes Womensquo;s Summit, knows that women are doing so much more than looking for a date in their 30s, and yet the media largely ignores their trials and triumphs. Their Roaring Thirties: Brutally Honest Career Talk From Women Who Beat The Youth Trap spotlights thirtysomething women who have an inner fire that has powered them through sudden changes, sick parents, workplace sexism, startup stresses, baby questions and much more. Candid, illuminating interviews with female executives, professors, lawyers and entrepreneurs provide a vital perspective on the many challenges these women face, along with what drives them to succeed. Their Roaring Thirties is sparking a new conversation to help millennials make sense of whatsquo;s to come and show Baby Boomers what drives the women building tomorrow's great companies.
