I followed their steps and am finding huge success with IPOs! On my first trade, I bought 100 shares at \$12 and sold at \$20. I was pleased with this profit, because it was considerably more than I get from other "short term" investments. I waited for the right IPO to "freakin' hit!" as the

authors say, and hit one that made me over \$11,000 profit in about two hours on the first day of trade. I STILL can't believe it! The book clearly details everything you need to know and do to get into trading IPOs online. If you have more questions, the authors even have their own website where you can contact them and get your questions answered. They know their stuff! What a great book!

By Ted V
This book kept me up all night, I couldn't put it down. I was so tempted many times while reading to drop the book, run the the computer and start right then in the middle of the night. Book is very easy to understand, not a lot of those fancy words you hear on CNBC or read in the Wall Street Journal. They take that stuff and bring it down to the level that an individual investor can understand. Authors very motivating and relate their experiences in the market very well.

By Warren Trent Dudley
The authors of this book have done an outstanding job of discussing and explaining techniques for investing in IPOs online. I believe that both the beginning and the experienced IPO investor will find this book to be a tremendous benefit in analyzing their IPO investment strategy. The presentation of the techniques in IPO investing available via the internet is clear, well written and certain help you increase your personal wealth. IPOs are no longer an investment vehicle for the elite investor.
