**Mr Simon Thompson : Trading Secrets: 20 hard and fast rules to help you beat the stock market (Financial Times Series)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Trading Secrets: 20 hard and fast rules to help you beat the stock market (Financial Times Series):

3 of 4 people found the following review helpful. Undiscovered GemBy ChawksI am very surprised that this book has been slow in getting getting reviews. I have over 200 stock market books and this one has some information in it that

none of my other books have. The book is well written and to the point. Read and reap! 1 of 1 people found the following review helpful. 43 high probability strategies for medium/long term investors By ServantofGod I am very sure that if one has the patience, discipline and system to follow the 43 proven strategies covered by this book, he/she will reap good profit year after year. The catch is, only very professional traders/investors can meet all the requirements above. Of course, it is not necessary to implement all the strategies at all to enjoy a definite trading/investing edge. A well researched resource for sure, particularly for those invest in the UK markets, though the principles are applicable else where. In short, recommended! 1 of 1 people found the following review helpful. Great insights/strategies By babyfat101 I got this book from the library and kept putting it off to read. However, once I did start, I'm very glad I did. I play the volatility, and found his suggestions very interesting. I will mark on my calendar to try them out. I HIGHLY recommend if you are a trader of any sorts.

Have you ever wondered how the top City traders make big profits from share trading? Do you know why the best investors know exactly when the market is going to rise or fall? And do you wish you could do the same? By following 20 hard and fast rules, Trading Secrets shows you how you can make the same high returns as experienced investors and traders. Using historical, economic and technical trend analysis from the last fifty years, it identifies the ways for you to capitalise on such events as the clocks going back or moving forward, religious holidays, major sporting events and even the US presidential election. Written for both experienced investors and also those with little knowledge of the stock market, Simon Thompson's practical investing guide offers trading strategies that you can use over the short-term or the long-term. For instance, do you know how daylight changes affect how the stock market performs and, more importantly, how to make big gains by trading on this knowledge? Or do you know which sector has massively outperformed the market in the first quarter of the year — posting a quarterly return of 12 per cent — in all but four years in the past three decades? Trading Secrets uncovers all and more importantly explains why these trends occur, so that you can be confident your investments will pay off, even when the market is falling.

"A quick note to short-term traders looking for an edge. Don't miss Trading Secrets by Simon Thompson" - FT 24 Jan 09

From the Back Cover Have you ever wondered how the top City traders make big profits from share trading? Do you know why the best investors know exactly when the market is going to rise or fall? And do you wish you could do the same? By following 20 hard and fast rules, Trading Secrets shows you how you can make the same high returns as experienced investors and traders. Using historical, economic and technical trend analysis from the last fifty years, it identifies ways for you to capitalise on such events as the clocks going back or moving forward, religious holidays, major sporting events and even the US presidential election. Written for both experienced investors and also those with little knowledge of the stock market, Simon Thompson's practical investing guide offers trading strategies that you can use over the short-term or the long-term. It covers economic and stock market cycles so that you can be confident in your trading strategies, even when the market is falling. Armed with Trading Secrets, investing will not only be enjoyable, but highly profitable too. "Simon Thompson is arguably one of the best stock-pickers of his generation, and the consistent results produced by his strategies put professional fund managers to shame. He's one of few financial journalists who can make investment analysis a gripping read" — Matthew Vincent, Personal Finance Editor, Financial Times "He is always insightful and concise with an enviable track record of correctly identifying trends. Anyone who has listened to his advice will have weathered the downturn comfortably and will be ready to profit whatever the market conditions." — Dr Stephen Barber, Head of Research, Selftrade

About the Author Simon Thompson has been Companies Editor of Investors Chronicle, the UK's leading magazine for private investors, since August 2000 and a finance journalist with The Financial Group in London over 10 years. His weekly Companies column for the Investors Chronicle is read by 35,000 online and magazine subscribers every week and is one of the most read sections of the magazine. Simon has an excellent track record at market timing, including calling the top of the Dow Jones Industrial Average within four days of the index hitting an all-time high in July 2007. His bearish view of the stock market has proved spot on with the four index short trades recommended in his Companies column producing an average profit of 44 per cent in 2008. Simon also has an outstanding record at stockpicking. Between 2004 and 2007 he gave 67 stock and index recommendations in his companies column in the Investors Chronicle of which 90 per cent showed a profit and an average gain of 33 per cent. In 2005, Simon had a 100 per cent track record with all sixteen of his recommendations in his column that year recording a profit.
