Ukraine has made impressive progress in restructuring and stabilizing its economy over the past two years, and yet much remains to be done to revive output and establish a market economy. The 16 papers included in this volume, edited by Peter K. Cornelius and Patrick Lenain, were presented at a seminar sponsored by the IMF and the World Bank in July 1996, which brought together government officials, academics, and staffs of international organizations to discuss a comprehensive medium-term strategy for Ukraine. The papers cover the medium-term macroeconomic framework; wages, poverty, and social safety net reform; private sector development; trade policies and sectoral

reforms; and institution building and good governance.
