**Phil Askham, Leslie Blake : Valuation: Special Properties Purposes** before purchasing it in order to gage whether or not it would be worth my time, and all praised Valuation: Special Properties Purposes:

Each topic treated represents an area of specialism in its own right. This book helps fill the gap between the extremes of neglect and detailed consideration in existing texts by providing an authoritative and yet accessible treatment of several complex and technical subjects. Each chapter has been written by an acknowledged expert in the field with

extensive practical experience, and where appropriate is supported by comprehensive case studies and worked examples. What this book emphatically will not do, is turn anyone into an expert in the specialist and even arcane worlds of the plant and machinery valuer or the valuation of milk quotas. What it will do, however, is give some indication of the problems and pitfalls associated with these fields.

From the Back Cover This volume is a collection of ten chapters covering topics concerning the valuation range of special properties such as woodlands and telecommunications installations and the valuation of general properties for special purposes such as land compensation and dilapidations. About the Author Leslie Blake is a Barrister and Lecturer at University of Surrey, Austen Imber MRICS is a West Midland based surveyor
