Seriously, there are many good points in the book for everyone, not just when the pressure's on. Reminders about nutrition and exercise, how to handle typical stress and

pressure. Overall, an excellent read. 1 of 1 people found the following review helpful. Not bad
By Jeff Woods I've been through quite a bit of leadership training, and this is a repeat of things I've learned in other classes. The presentation is still interesting and reinforces those lessons well, though. This would not be a bad introduction for someone who had not had this exposure. Unless I completely missed something, the CD seems to be lacking the "supplemental materials" referenced throughout the recordings. I would assume that these are available in an appendix to the book. 0 of 0 people found the following review helpful. Fantastic book
By Dr. Robert Conder Fantastic. I've only started reading and in the first few pages, have identified some areas hindering my performance and areas that will help my patients. I met Dr. Csoka a few years ago at AAPB and was very impressed with him as a person and a professional. Well written, great book.
