Patricia Voydanoff : Work, Family, and Community: Exploring Interconnections (Applied Psychology Series)
before purchasing it in order to gauge whether or not it would be worth my time, and all praised Work, Family, and Community: Exploring Interconnections (Applied Psychology Series):

Research in recent decades has proven that the seemingly disparate worlds of family life and the workplace are in fact

closely intertwined. Moreover, scholars have begun to recognize the extent to which community life influences the work-family interface, for instance, the lack of fit between school hours and work hours, and assistance provided by community-based child care services. *Work, Family, and Community* is the first to provide a comprehensive review and analysis of the theoretical and empirical research that has examined the complex interconnections among these domains. This book integrates literature from several disciplines, including sociology, industrial-organizational and occupational health psychology, human development and family studies, management, gender studies, and social work. It documents significant patterns and trends in the economy and looks at the health of communities and neighborhoods, exploring the level of social integration, availability of community services, and the extent to which such services meet the needs of working families. Author Patricia Voydanoff takes an important step in conceptualizing the components and processes that comprise the work-family-community relationship, and provides direction for future theoretical and empirical work on the topic. This volume speaks to scholars, researchers, and students who address the theoretical, empirical, and policy-relevant issues associated with the work-family-community interface.
