A Book Every Aspiring Entrepreneur Should Read Before Launching a Business By Nikki Leigh Part of the American Dream is to own your own business. Millions of people have done this - but we also know that many people fail in business every year, many in the first years. So, is there a secret to succeeding as a new entrepreneur? There are a number of factors and *Young Guns* by Robert Tuchman is a very good place to get started. Anyone who is in business for themselves knows that there are many things that make a difference in the success or failure of any business. I've managed businesses for over 20 years for a wide variety of business owners and usually I was hired to reorganize and fix struggling businesses. This gives me a unique perspective in the qualities and decisions that make a successful entrepreneur. So, I was very interested to read *Young Guns* and to see what Robert Tuchman had to say. I cringe every time I hear someone say "All you need is a great idea and you'll be a success." I was participating in a writer's conference symposium for business authors and the man beside me said that and I had to chime in and disagree. It made for an awkward hour - but it had to be said. So, I opened this book and waited to see if the author would say that. I'm very glad to report that he did not. I was very glad that the first chapter is titled "Why Not Me?" What a great way to start the book? It made me even happier when I looked at the table of contents and found "The Idea" was chapter 3. Robert Tuchman tells the reader to be sure that it is really a big idea. Just being excited about an idea isn't enough and many times we hear that it's only important to find something that the market needs. While these are all elements of a successful idea - Tuchman says that it's also important to find something that you are truly interested in. This proves that my "big idea" probably wouldn't be your "big idea". I've always said that people should never make the decision to start a business without putting together a business plan. This can be daunting, but it's also very revealing. In *Young Guns*, Tuchman provides a simple game plan to help the aspiring entrepreneur get started. This is not a complete and in depth business plan, but it is enough to help you get started and to evaluate your idea to see if it's feasible. There is a chapter about business partners. Should you have one? If so, what sort of person should you choose? The right or wrong decision about a business partner can have a huge impact on your business and your life. He talks in depth about service - just selling a product or service is not enough. You need to back up your product or service with great customer service. As I was told years ago by my grandfather - great customer service guarantees you have customers and without customers you won't have a business. These are just a few of the things I really enjoyed about *Young Guns* and I highly recommend it for a person who is considering starting their own business. This is a book that you can and should read before you have an idea - it could even spark a great business idea and he will also help you develop the skills you need to launch a business.

From the Inside Flap When Robert Tuchman graduated from college, he had a burning desire to follow his passion and make a name for himself. He was quickly forced to abandon his dream of being a sports writer, eventually accepting a position as a stockbroker trainee. Like many graduates, he soon realized that he was completely unfulfilled in his new job. "There has to be something better than this," he decided. In *Young Guns*, Tuchman shows how you can pursue your own dreams of making it big and breaking free from the pack. In addition to his own, he tells the incredible stories of other young guns who fulfilled their dreams, including three PayPal employees named Steven Chen, Chad Hurley, and Jawed Karim, who started a little website called YouTube, where users could upload, view, and share video clips. Using their unparalleled marketing savvy, design skills, and a hunger to create something of their own, they turned the site into a phenomenon. Eventually, these three young guns sold their site to Google Inc., for \$1.65 billion. Entrepreneur Tuchman shows you that you can break out on your own and achieve your dreams. He explains how to start out on a business venture, and what you need to sacrifice along the way in order to succeed. As a young gun himself, Tuchman is an expert on taking risks and starting your own business. Tired of working at a job with little prospect of advancement, he formed his own company - Tuchman Sports Enterprises - out of a corner of his apartment with one phone and a fax machine. Within two years, his company was named to the annual Inc. 500 list of America's fastest-growing privately held companies. With his hard-won advice, you will discover how to: . . . . . Set priorities for that all-important first year.
