Usable information, great introduction and referenceBy Tara ReedYour Portable Empire by Pat O'Bryan has opened up a whole new world and added a new income stream to my business. I attended a weekend seminar put on by Pat he is the real deal. He isn't just writing about internet

marketing, he has 'been there, done that, still there and still doing' -- best of all, he is willing to share how to do it. Not only have I read, implemented and followed his advice in building the internet marketing leg of my art licensing business, but by giving this book to several friends, I have opened them up to the real possibility of changing their lives with this approach. Every one of them has thanked me. Pat's advice is usable -- by reading this book you can get started. He shows you how. He shows you where. He gives links to many free resources. The book covers everything from choosing a topic that you are passionate about to building a list to creating the products. He also talks about Mind-Set and I believe this is a power piece of the book. If you aren't ready to believe in yourself and take the necessary steps to succeed, then you won't. No book will help you. I feel this book helps in the two key areas of success: what to do and how to keep your head in the game. If you are truly ready to make internet marketing and information products part of your life, you can't go wrong with "Your Portable Empire".

By J. Rubino Overall it is pretty good. My main complaint is the bombardment of look alike products with different names. This is another book for creating an information product business-selling how-to-sell information products and how to get started in internet marketing. There is a number of well networked individuals selling the same kind of dream-specifically creating passive income streams mostly through automated internet e-books and information products that can be downloaded instantly and the proceeds deposited into a bank account. This group has smartly cross-promoted each others work including good reviews and glowing testimonials. (actually a smart strategy; unfortunately most savvy customers discount these reviews) So if you can create an appealing set of products to promote ongoing to a database of potential customers over and over you can create your own "Portable Empire" as Mr O'Bryan has. The overall premise and approach might work in the real world but it is not as simple as he makes it out to be. Building a list from scratch and offering a new or niche product are challenging to say the least. Also, a couple of examples didn't hold up for me; for example he says to take a hobby or area of interest and build a group of products around it. One example he uses is golf- I had a hard time imagining a set of information products with golf as the main theme being a regenerative information product stream-not enough to build the income stream to have the lifestyle that he espouses. Felt a bit forced for me but there are some people for whom this book will provide enough of a blueprint to actually create something of value.

By Monica Main When I read the forward by Joe Vitale I was immediately put off by the book. I am NOT a Vitale fan and don't like his marketing tactics at all. When I read the first line of the book to my husband -- "This is the most dangerous book you'll ever read..." (or something to that affect) -- he told me that if it were him he'd throw the book in the trash instantly. He's not a big fan of bullsh**, clearly. As I began reading the book I almost wanted to throw it in the trash. Especially when I read the section on "What is an e-book?" If someone doesn't know that then they don't deserve any opportunity to make money online. I'll admit: There's no specific step-by-step to use in this book and it is very incomplete. Pat (the author) doesn't talk about his specific successful online campaigns through Google Adwords. He doesn't talk about what kind of info products he sells (although I wouldn't either). He misleads people into believing that you could make tons of money selling ebooks on topics like "how to sleep better" which is NOT a topic that would sell well at all. My theory: He sells "money making" info products online and doesn't want anyone else to crowd how he makes his money online. Why did I give this book 5 stars? Two reasons: 1) He does a good job covering successful copywriting which will make or break your success with online (or any) marketing. Copywriting is the key. 2) In the lateral half of the book he discusses "mindset" in a way I have never read before. I've read hundreds of self-help titles and this book is unique in providing a different view of changing your mindset which made this book well worth it. Buy this book if you want to be successful financially. No, it won't give you any instruction other than to create your own info products and sell them via Google Adwords. However, it will open your mind to the possibilities and help you change your mindset for success. That, alone, is worth reading this book.
